## PROFESSIONAL SUMMARY

Software Developer with hands-on experience building full-stack applications, REST APIs, and Windows command-line tools using C#, .NET, JavaScript, Java, React, Node.js, and MongoDB. Strong foundation in OOP, data structures, system programming, and software design, with a focus on building practical and scalable software.

## EDUCATION

### Bachelor of Computer Applications (BCA)

2023 – 2026

Fr Agnel College of Arts & Commerce, Pilar

CGPA: 8.77/10

## TECHNICAL SKILLS

### Programming Languages

Java, JavaScript, C, C#

### Frontend

HTML, CSS, React.js, Tailwind CSS

### Backend

Node.js, Express.js, REST APIs

### Databases

MongoDB, MySQL

### Tools

Git, GitHub, .NET, Postman, Cloudinary, render, Vercel

## CORE CONCEPTS

- Object-Oriented Programming (OOP)
- Software Development Life Cycle (SDLC)
- JWT Authentication
- Client-Server Architecture
- Data Structures & algorithms
- API Design
- Role-Based Access Control
- Transaction and ACID

## PROJECTS

### Gopt – Windows Gaming Optimizer 🔗

C#, .NET

- Built a Windows command-line gaming optimizer using C# and .NET, distributed as a self-contained CLI application with a Windows installer.
- Developed a JSON-based rule engine to classify running processes into categories such as Critical, Gaming, UserApplication, Background, and Unknown.
- Implemented process scanning, memory analysis, and real-time CPU and memory monitoring using Windows Performance Counters and System.Diagnostics.
- Designed a safe optimization workflow featuring preview (--dryrun), force mode (--force), protected system processes, and user confirmation before terminating processes.
- Packaged the application as a self-contained installer, enabling users to install and run gopt from any terminal without requiring the .NET runtime.

### Minecraft-Inspired Developer Portfolio 🔗

React.js + Tailwind CSS

- Designed and developed a responsive personal portfolio website with a custom Minecraft-inspired user interface using React.js, Vite, and Tailwind CSS.
- Built reusable React components, custom animations, and smooth scrolling to create an interactive user experience.
- Showcased technical skills, projects, GitHub profile, and resume through a clean, component-based architecture.
- Implemented SEO best practices, responsive layouts, and deployed the application using Vercel.

## Job Tracker Application

*MERN Stack*

- Developed a full-stack web application following client-server architecture
- Designed and implemented REST APIs using Node.js and Express.js
- Implemented JWT authentication and secure cookie-based sessions
- Developed CRUD functionality for job applications and resume management
- Integrated Cloudinary for file upload and document management
- Built responsive frontend using React.js and Tailwind CSS

## Typing Speed Test

*React.js + Tailwind CSS*

- Developed an interactive typing speed test application with real-time WPM, accuracy, and mistake tracking
- Implemented countdown timer modes (30s/60s), live character highlighting, and Caps Lock detection
- Designed a responsive interface with dynamic result popups and performance-based meme/reaction displays
- Built using React Hooks, reusable utility functions, and component-based architecture
- Deployed on Render.

## Church Management System

*MERN Stack*

- Built a full-stack MERN application to digitize and manage church records
- Implemented secure JWT-based authentication and role-based authorization
- Developed RESTful APIs for managing users, records, and service requests
- Integrated file upload functionality for document management
- Implemented Stripe test payment flow for service transactions
- URL: <https://github.com/Nithesh1029/The-Church>

## Flipkart Clone

*MERN Stack*

- Developed backend APIs for an e-commerce platform using Node.js, Express.js, and MongoDB
- Implemented authentication and authorization using JWT
- Designed MongoDB schemas for users, products, and cart management
- Built features including add-to-cart and quantity management
- URL: <https://github.com/Nithesh1029/E-commerce>

## Book Store Management System

*Spring Boot + MySQL*

- Developing backend bookstore management APIs using Spring Boot and MySQL
- Implementing CRUD operations using Spring Data JPA
- Following layered architecture with Controller, Service, Repository, DTO, and Entity layers

## INTERNSHIP EXPERIENCE

---

### Web Development Intern (WordPress)

- Developed responsive websites using WordPress
- Customized themes and integrated plugins based on client requirements

### Graphic Design & Video Editing Intern

Created visual and promotional content for social media and branding

## ADDITIONAL INFORMATION

---

- English, Konkani, Hindi
